

PSWinCom Intouch is a web-based solution for mobile communication. Intouch gives you full control of your mobile (SMS, MMS and WAP) communication.

Features includes group messaging, import/export from/to Excel, define mobile content services, deploy WAP portals and more. Intouch is built with the needs of SME's and volunteer organizations in mind.

You don't have to download any software. Everything is accessible through a standard web-browser. Using two-way messaging you may even trigger group messages from a mobile phone by just sending an SMS.

Why SMS ?

- *Most people own a cell-phone today.*
- *The cell-phone is "always" online.*
- *Inexpensive form of communication.*
- *Saves time and resources.*

PSWinCom Intouch comes in 3 different editions; Basic, Standard and Business.

Check the feature comparison chart on the next page to find the right version to cover all your needs.
